

A Camacã Design

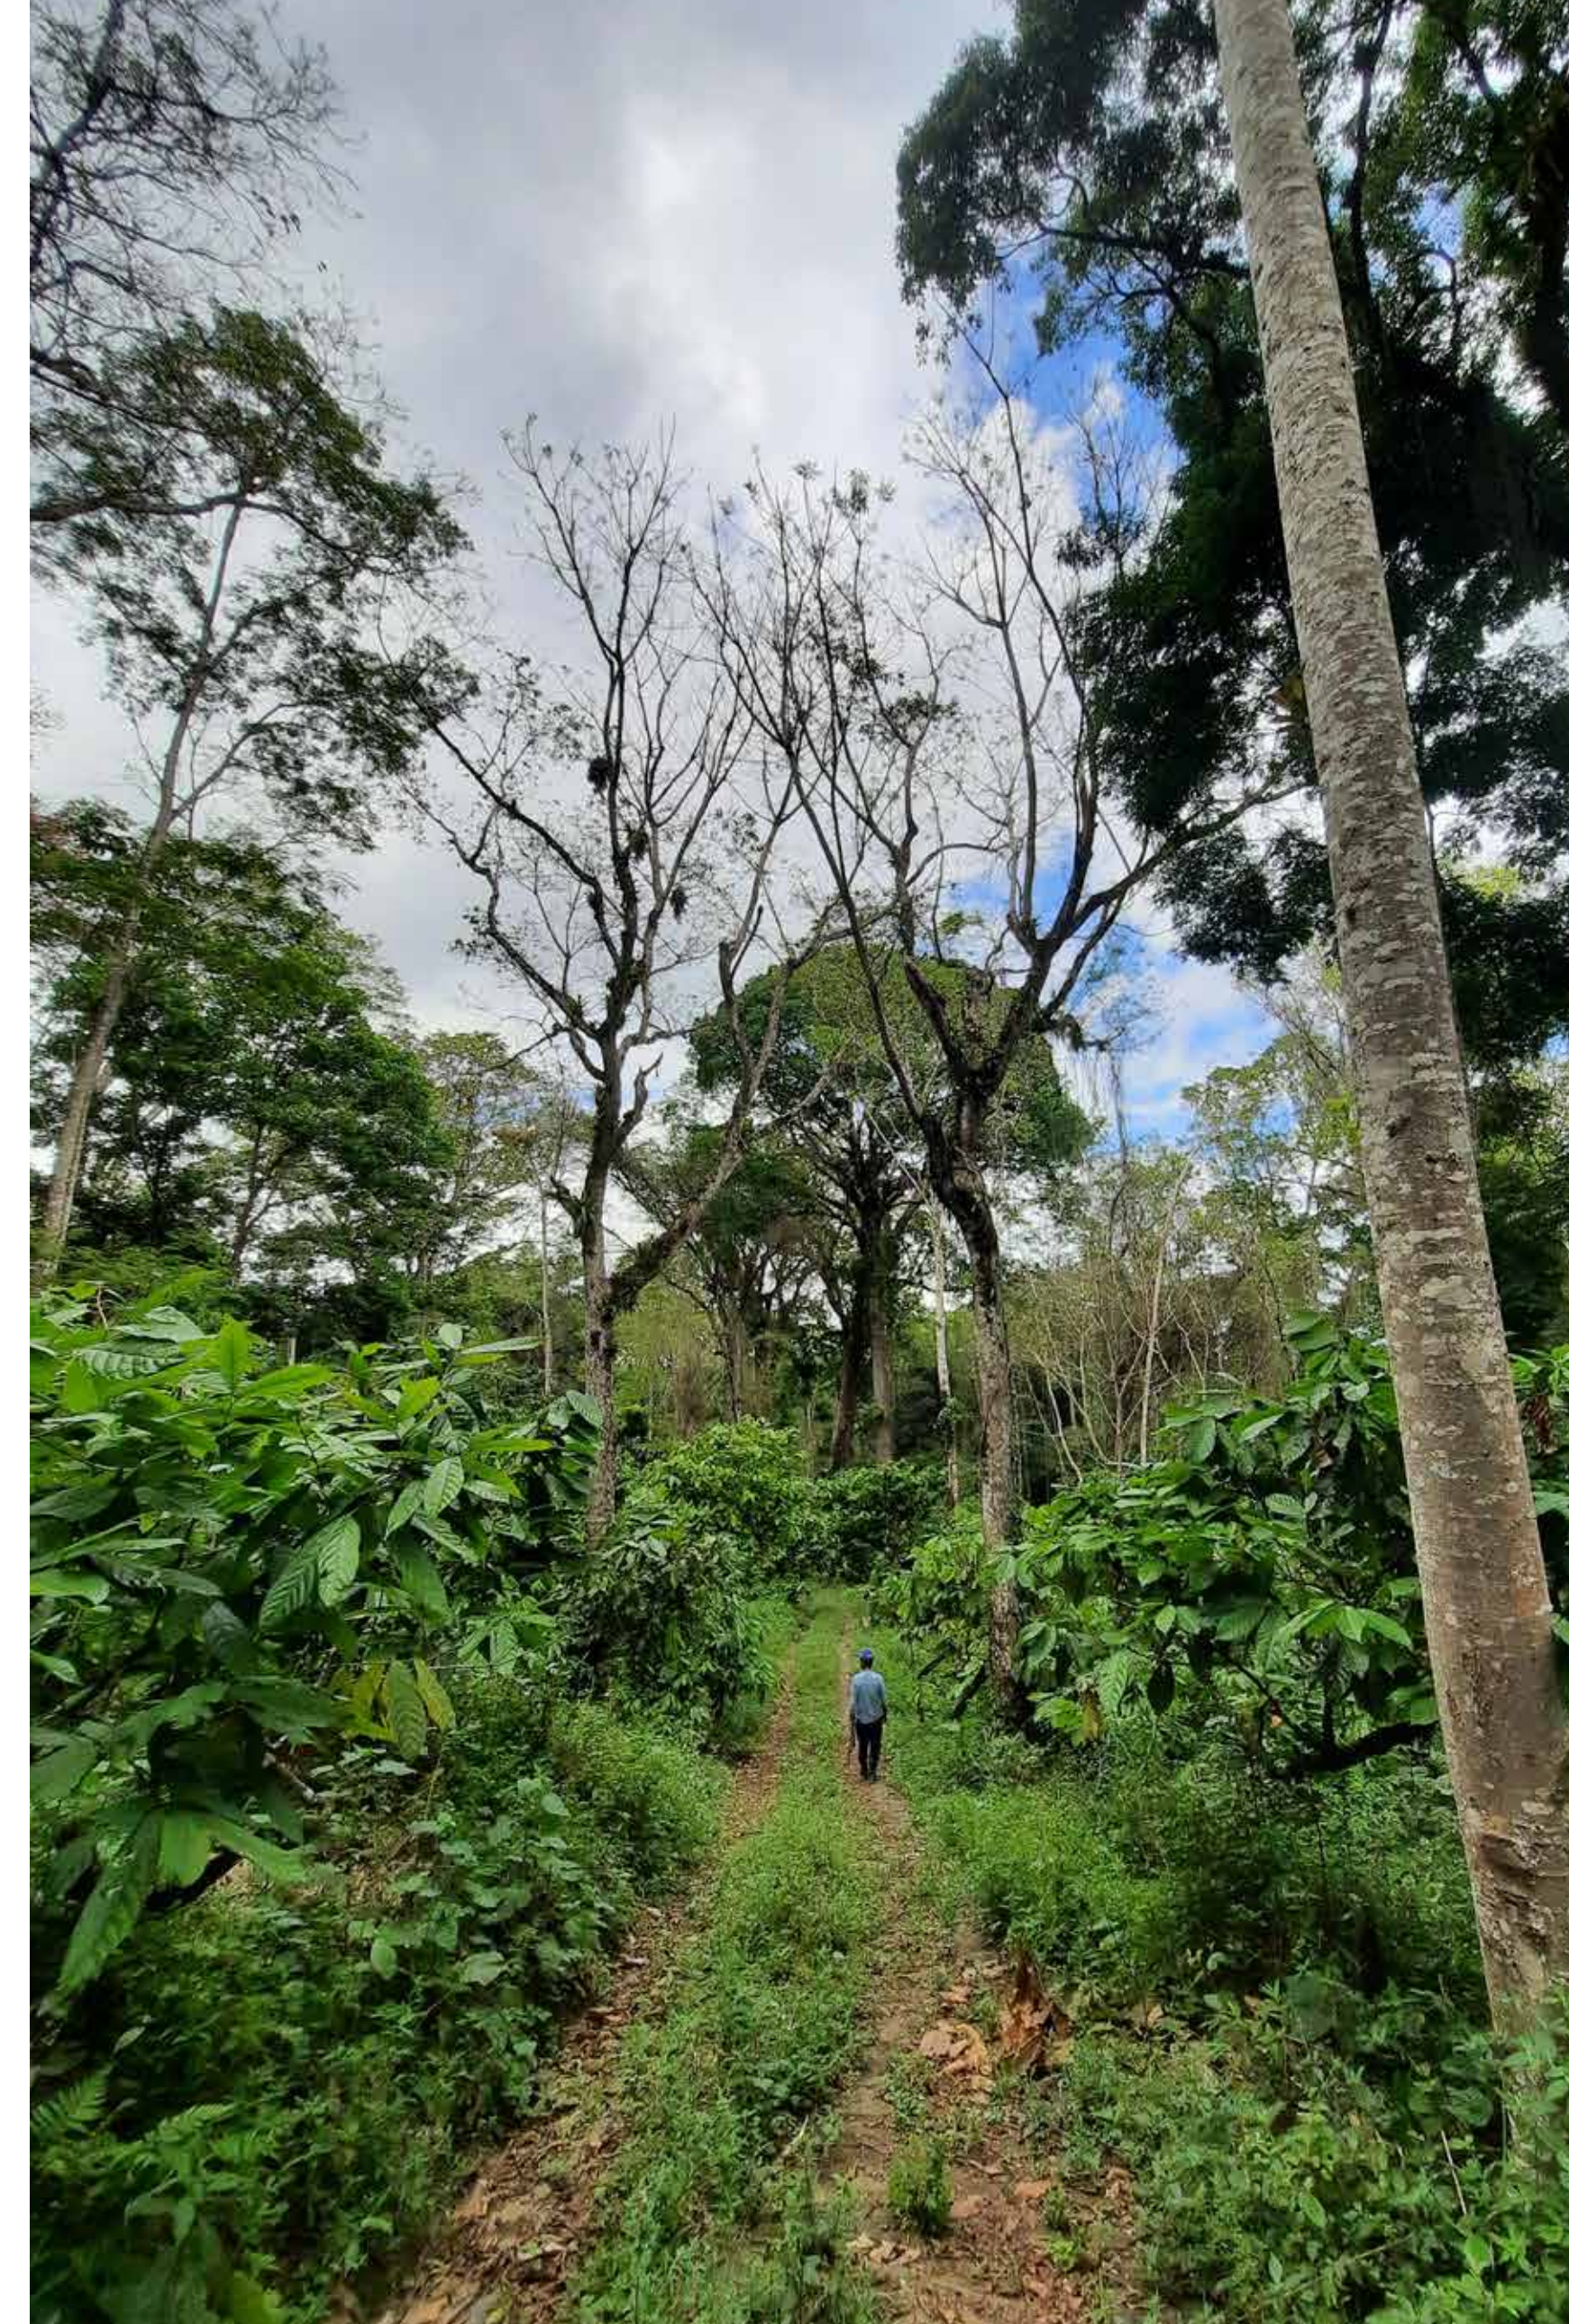

Having its main focus on sustainable development, Camacã Design reuses dead and naturally fallen trees to preserve and create unique products of excellent quality.

Our source of inspiration and raw material comes from the Atlantic Forest, preserved in its own area, located in the municipality of Camacã, Bahia. It is a land that was, for generations, an area of cocoa production, whose cultivation always had the preservation of the original soil and trees as a non-negotiable factor.

Respecting the sustainable development that it has always sought to implement, Camacã Design has a wooden furniture production process that respects the cycle of nature.

Camacã products are not just furniture, but unique, original artifacts that privilege respect for nature and for the native species of the Atlantic Forest.

A Camacã Design

We contemplate architectural and interior design projects with our sustainable products, naturally sculpted by nature and cut with excellence by Camacã Design.

We are the only ones to combine sustainability, sophistication, history, and uniqueness in the production of wooden furniture.

Our broad portfolio includes:

- ⦿ Tables, coffee tables, sideboards
- ⦿ Chairs, sofas, and benches
- ⦿ Sculptures
- ⦿ Other products, such as serving trays, sink countertops, cachepots, beds, wooden panels, ice buckets, cutting boards

In addition, we work with 100% customized projects, by receiving the project from an architecture and design professional to find, in nature, the wood of a fallen tree that can give rise to the projects which are idealized by their client, bringing the values of sustainability and millenary stories of the cycle of life.

Sumário

- 4 Coffee tables
- 10 Tables
- 11 Sideboards
- 13 Chairs, sofas, and benches
- 18 Sculptures
- 19 Others
- 22 Personalized projects

Personalized projects

Upon receiving the project of interest to our customers, we look for the source material in nature that will best fit their projects, bringing unique refinements that only nature and its organic forms can offer.

Thus, it is possible to bring the concept of sustainability into a house as a way to actively contribute to the preservation of the Atlantic Forest.
